

January 2009

Hi,

Wish you all a very happy new year.

We are pleased to inform some of the important NSR updates for this month.

- More than **3,90,000 colleagues** in the Indian IT/ITeS industry have registered their details on NSR web-site.
- **72 leading** companies are participating in this initiative (list available on NSR site). These companies represent almost **60 % of the industry employee strength**.
- **Yahoo Software Development and Standard Chartered Capital Markets** have joined NSR recently. We welcome them to the system.
- **A new POS office has been started in Electronic City, Bangalore** (Address and contact details available at: <https://nationalskillsregistry.com/POS.html#2>). This may really help schedule registrations.
- **NSR incentive scheme** which offers incentives to companies registering their employees / new job applicants and uploading background check reports has been extended.
- **NSR System is being upgraded to provided following additional features (expected to be made available in a week's time (you may want to tweak your communications accordingly)):**
 1. **Email to professionals on generation of Acknowledgement Number:** An email will be sent to each professional on the day of him/her registering details on NSR website i.e. generation of Acknowledgement Number. This email will inform the Acknowledgement Number (lot of people used to forget !!!) and the steps to be taken next to complete the registration.
 2. **Registration reference for the professionals:** On the first page of the registration module, each professional registering will be requested to indicate the details of the company that has asked him/her to register. This will help in relating the professional to the company that has asked the professional to register and giving back information about registration completion to such company.

If present employer company has suggested registration, professional can select such company name and also enter his/her employee ID. In case a prospective employer company has suggested registration, professional can select such company and also enter his/her application reference details. These features will help in giving back information to you about registration completion by professionals.
 3. **Making employee ID in present employment details mandatory**
 4. **Facilities for registered professionals to search their ITPIN, reset their Log-in ID and Passwords all by themselves on NSR website!!!!** (I guess this month's edition is getting longer, so I will write the details of these features separately and also send you updated Registration Checklist, FAQs)

This update and further editions will facilitate creating NSR understanding and sharing updates about progress and new initiatives happening on NSR system. We believe that this could be one of the ways to bring NSR and its members closer and will help us uniformly update you about NSR and its various features. Please feel free to write to us for any doubts/problems/clarifications/additional information.

Looking forward to your continued support.

Best regards,

Vijay & NSR Team
